SOUTH MICHIGAN NURSERY

Minnesota 1166

At Last! An Everbearing Strawberry That Has Everything Starts Bearing 60 Days After Set and Continues Bearing Till Heavy Frosts. 3 CROPS IN 18 MONTHS!

Minnesota 1166 is a large, long-pointed berry, produced on long-branched fruit stems, well hidden under the leaves for good protection. The color of the fruit is on the dark red order, and a solid red clear through the berry, even when the berry is still not quite ripe. The flavor is even better than the Wayzata everbearing, which up to now has always been the best flavored berry.

Minnesota 1166 is just as productive as any everbearing strawberry we have grown, and makes a good quantity of plants. For best results in fruit production, we recommend that the runners be pinched off as fast as they appear in the summer. It's a strong grower, resembling the Missionary variety. The fruit is attached to a fine green hull that will not pull out even when the berries are dead ripe. This, with the small amount of juice that this variety

contains, will make it the very best jam berry ever introduced. This variety has been known to keep five days without refrigeration, and never mold or spoil in the hottest weather. It will dry up like a raisin before it will spoil. This will make it the coming commercial variety, as most other everbearing varieties will not keep long after picking.

Minnesota 1166 berries shipped to the South Water Street market in Chicago this summer sold for \$7.50 per 16-pint crate. Once you have tasted Minnesota 1166 berries you will eat no other kind. We know, for we grow all the varieties and at our table we choose the Minnesota 1166 every time. We have 150,000 of them to offer and we are sure this will not go half way around, so send in your order early and take advantage of the discount we offer for early orders.

THE NEW EVERBEARING

Streamliner

Enormous Size --- But Never Hollow

We have never seen a more beautiful Strawberry. Almost round, bright scarlet in color, and the very largest berry of all everbearing Strawberries. Outyields both Mastodon and Gem. Sweet as honey, with very little acid. Ripens red all over at the same time, even late in the fall. Bears 60 days after set, and will bear the second year as well as the first. From late June to late in November it will be loaded with ripe berries, green ones, and blossoms all at the same time.

This is going to be a real running mate for the famous Minnesota 1166 which we offer above. Try them all and compare them. See which one does the best for you in your locality. This variety, like all the everbearers that we offer, will bear alone—perfect flowering. Our price, while they last, is as follows:

New Buffalo . . . Michigan

Premier

Stromer's PREMIER

The Most Popular Berry Ever Introduced

If you plant STROMER'S PREMIER you will get the first berries on the market. They will be bearing heavily before other varieties begin. Your biggest picking will be when berries are in good demand and are bringing top prices. Premier will grow anywhere. The plants are sturdy and long rooted, a good drought-resister. The berries are very large, and hold their size to the last picking. The flavor cannot be beaten.

In Premier we offer you the greatest early Strawberry of all time. However, the early ripening of this variety is only one of its many good features. It is immensely productive and, unlike other early ripening Strawberries, the fruit produced by Premier is of the very finest quality, color, texture and flavor; and last but not least, every berry is large in size and uniform in shape. For every purpose that a Strawberry is wanted, Premier is supreme—eating, canning, preserving, distant and local market—no other variety can give you any more pleasure, satisfaction or profit. Premier succeeds everywhere and never fails to give a big crop of the very finest berries. The foliage is tough and healthy and grows tall and rank,

covering the blossoms and berries, and protecting them from frost and scalding sun.

SENATOR DUNLAP

Senator Dunlap is an old well known variety that has made more dollars for berry growers than any other variety. It grows most anywhere, and is the toughest, healthiest and fastest grower of them all. Berries dark red, not so large as others but the quality is fine. Wonderful for canning, as well as fresh. Sometimes listed as Dr. Burrill.

BRUNE'S MARVEL EVERBEARING STRAWBERRY

This is another new variety of everbearing Strawberry that differs from all others in this way: For you folks who cannot eat other varieties of Strawberries, can eat this one. No acid, and about all sugar. This variety will not cause a rash like others do on some folks. It's really so sweet that no sugar is needed. Mild and smooth. Seeds are so small that they are hardly noticed. Berries large, bright red, and bears 60 days after set, and is still at it when it commences to snow. Bears the very best in September and October. Have very few plants to offer this year. If you want to try this one order early.

ROBINSON (New)

Latest Thing in Spring-Bearing Strawberries

Crossed Between Premier and Washington Varieties

This variety was found here in Berrien County, Michigan, several years ago and has been thoroughly tested and by this time known as the best late Strawberry to grow. Greatest shipping berry known.

MARVELOUS QUALITY

These big round blunt-pointed berries are of top quality. They are borne on large thick fruit stems, that are well protected with a heavy foliage that makes up a wide fruiting and picking row. The tangy rich sweet flavor is found in no other Strawberry. Just imagine yourself ready to start working on the dish full of the berries below. Solid red all the way through and full of rich red juice.

LONG FRUITING SEASON

Robinson starts to ripen soon after Premier and continues right through the late Strawberry season. No let-up at all. Every berry a large one right up to the last picking. Bring a much higher price on the market, so it's the greatest money maker of all Strawberries. Sold for 50c a crate more than Premier.

HEALTHY FOLIAGE

The plants make a fine wide picking row, and foliage of the healthiest. Will grow on most any type of soil, just so that it is well drained. This is the first year we are offering it to you and naturally our stock is somewhat limited. Not a diseased plant in the whole lot was found by the State Inspector. Our prices are reasonable, and would advise you to plant all you can afford to buy to get a start of this wonderful berry.

Cumberland

THE BUSINESS BLACKCAP

This is without question one of the most profitable and popular Black Raspberries ever grown. It is the one safe and reliable commercial variety because you can depend on a big crop regularly. We call it the "Business Blackcap" because it succeeds on all soils and produces its big crop year after year.

We have never known Cumberland to fail, and the best proof that it is a profitable variety is the fact that the demand for plants is greater every year and more Cumberland plants are planted than all other varieties combined.

Cumberland is perfectly hardy and tremendously productive. The berries are extra large, glossy black, and not equaled by any other variety in quality, flavor or appearance, except Morrison. Whether wanted for market or home use, we can recommend Cumberland to our most exacting customers. Disease free. Twice state inspected plants.

MASTODON

Everbearing

**3 Full Crops in 18 Months
3 Big Profits**

Mastodon has been with us for about 20 years, and in all these 20 years we have never known them to fail on a full crop 5 to 6 months long the same year they were set out. The size of the berry is like Wayzata—very large. It is of very good quality, red all the way through, and fine flavor. Bears as heavy as Wayzata, and makes many new runner plants. These new runner plants will also bear towards fall, and then you have a real picking row. This wide row will make fine picking the next June as a spring berry. Mastodon does not require any special soil, care or petting. They grow most anywhere, or on any soil that will grow garden or potatoes. They sell like "hot cakes" on roadside stands, or on any market. It will take a hard freeze to stop the Mastodon from bearing. White frosts will never hurt them at all. A field of Mastodon in full bearing in late November is a sight never to be forgotten. Even after a light snow one can go out and find ripe berries unharmed.

Mastodon

WAYZATA

Everbearing

WAYZATA challenges the world in flavor, size and productiveness. Now matched only by Minnesota 1166. Newly set plants start to bear in 60 days, and continue for nearly six months without any let-up, if they are cultivated once a week, and all weeds kept out. Adapts itself to most any type of soil. Plants are hardy and tough. Their dark green, leathery-like leaves are rarely attacked by common Strawberry plant diseases.

WAYZATA plants set in the spring of 1945 will start to bear within 60 to 90 days, and bear all summer up to severe killing frosts. They will again bear a full crop in June, 1946, and another in the fall of 1946. Three nice big crops in 18 months. It is not an unusual thing to have fresh Strawberry shortcake for Thanksgiving days—both of them. 100 plants will be sufficient for an average family.

PRICES

GEM

Everbearing

Gem differs a little from Wayzata and Mastodon in this way: Gem prefers a clay or a heavy sandy loam soil, where Wayzata and Mastodon do well on most any kind of soil. Gem also does best when grown in the hill system, so for best results keep all runners nipped off. The berries are large and smooth, and of a light red color, that ripen up even all around. Bears equally as heavy as Mastodon, and the berries get larger towards fall. Runner plants will bear as well as the mother plant. Gem is a good plant maker. Makes a good June-bearing variety. Bears 3 crops in 18 months. Gem makes a beautiful quart of berries. Berries like these sell for 50c a quart around Thanksgiving and bring good prices all summer long.

Red Raspberries are so scarce that we wish you would give us second choice in ordering.

SUNRISE

The **OUTSTANDING NEW RED RASPBERRY** originated by the U. S. Department of Agriculture has now been christened **SUNRISE**. It comes to fruit growers with many advantages over older sorts.

DR. DARROW and **PROFESSOR CLARK** describe the new berry in the U. S. Department Circular 397. It originated as a cross between **Latham** and **Ranere**. Among other things they say:

"Of most importance about **SUNRISE** from the standpoint of the practical grower perhaps, are:

1. "**HARDINESS** and **RESISTANCE** to disease."
2. "**EARLINESS** and **LARGER SIZE** of the berry as compared with **Ranere**."
3. "**BETTER TEXTURE** and **QUALITY** of the fruit compared with **Latham**."

"In New Jersey where **SUNRISE** has been grown commercially for a period of six years, it has been outstanding."

MR. BLACK, a prominent New Jersey fruit grower, writes June 12, 1942:

"Have picked **SUNRISE** twice from plants planted in the spring of 1941 and had fair picking from this one-year-old field. They brought 25c a pint. We do not think **Latham** will be ripe for 2 weeks as they are just shedding their petals. Have a good prospect for a heavy crop."

These comments from competent and practical men are evidence that this **NEW SUNRISE** will find an important place in Raspberry growing. It combines the most necessary characteristics of a successful berry—**HARDINESS—RESISTANCE** to **DISEASE—EARLINESS** and **HIGH QUALITY** of **FRUIT**.

It Pays to Mail Your Order Now

20% discount will again be allowed for all 1945 fall orders. If this catalog reaches you after January, 1945, we will allow you 10 days' time to take advantage of the 20% discount. This is done to be fair to folks who ask for the catalog and receive it after discount dates.

Your order will not be shipped until you are ready for it in the spring.

GUARANTEE

We guarantee all of our nursery stock to be just as represented in our catalog; fully up to grade, of good quality, free from disease, and absolutely true to name; also to reach the customer alive, and in perfect growing condition. Furthermore, we will, at our option, either replace free of charge, or refund purchase price on any stock that arrives in bad condition; providing claim is made within 5 days from arrival of shipment, accompanied by a signed statement from the Express Agent or Postmaster at destination, showing extent of loss or damage. If any stock proves untrue to name it will, at our option, either be replaced free of charge, or purchase price will be refunded; but in no case will we be responsible for a sum greater than the original purchase price paid. Beyond this our liability ceases. It is understood and agreed between the customer and ourselves that the purchaser's order, and our acknowledgment of its receipt, shall constitute a mutual acceptance of the above terms and conditions.

REMITTANCE

Remit by draft, post office money order, express money order, registered letter or your personal check. Stamps may be sent for small orders. For the very best service, send money orders.

The ALFRED BLACKBERRY

Our 2-year bearing-age plants bear a year sooner—berries first year.

STANDS 30 DEGREES BELOW ZERO, GEO. STROMER, ORIGINATOR

Year after year, with diligent care, I have propagated these plants to such an extent that the fruit is now being supplied to the local markets at a fancy price, and is always in good demand. Last year I measured a good many berries that were over one and one-half inches long, and three inches around. Buy from the originator and get **GENUINE ALFRED**.

EXTREMELY HARDY. **ALFRED** can be grown anywhere without winter protection, having withstood 30 degrees below zero, and not a single tip of a branch injured, while our other varieties were frozen to the ground.

EARLY SEASON. It ripens a week to ten days earlier than **Eldorado** and in productivity it is in a class by itself. We have seen them bear a second crop. We picked many crates this year in September.

Thornless Boysenberry

All of the Good Qualities of the Regular Boysenberry—BUT NO THORNS

This is the early ripening strain of Thornless Boysenberry with canes as smooth as a grape vine. **RIPENS 10 DAYS TO TWO WEEKS EARLIER THAN BOYSENBERRY.** The introducer claims even heavier yields from this Thornless Boysenberry than the common Boysenberry. This new strain Thornless Boysenberry is identical to the Boysenberry except that there are no thorns and it ripens earlier. This is a very good feature as the early berries bring more money. The Thornless is just as hardy, rugged and heavy bearing as its parent the Boysenberry. Vines grow 25 feet long, and this pretty apple-green vine loaded with giant purple beauties is a sight you will never forget, and after you taste a handful of them, other berries will go begging for a while. Delicious with cream and sugar, and when made into jam, it's the last word. Supply of plants still limited, so hurry.

LATHAM Red Raspberry

Commercial Growers' First Choice

This is beyond a single doubt the very best of all the Red Raspberries so far. Latham is large, some measuring an inch in diameter, firm, sweet, few seeds, and perfectly hardy. Stands 45 degrees below zero. Grows tall heavy canes that can carry the heavy load. Finest variety for commercial growers and home use. Prices at left.

INDIAN SUMMER Everbearing

This new two-crop or everbearing Red Raspberry was introduced by the New York Experiment Station. It bears in July like any other Red Raspberry, and also in the fall, beginning in September on the new growth, and continues till frost. The berries are large, conical shape, and of extra fine quality. This variety is by far the best of all the everbearing varieties so far. We have discarded St. Regis for this new variety. Prices at left.

MORRISON

Blackcap Raspberry

Largest Blackcap Raspberry Grown—Berries as Large as a Quarter.

Would you believe that there could be a Black Raspberry that would grow larger than the Cumberland? Well, there is one now called the Morrison Blackcap. This new variety was found growing wild in Girard, Penna., by County Agent Paul Crossman of Erie County. Mr. Crossman was attracted by its unusually large size, and its shiny jet black color. The berry is much larger than the Cumberland, many of them nearly an inch in diameter. Mr. Crossman says that the plants are very free from disease, and are vigorous growers. We have been fortunate in obtaining a limited amount of these plants for our own propagation purposes, but we are going to let a few of them go to our customers for 1945. Don't wait too long, as when our stock is sold, we will have to refund the money, and you will have to wait to get your start. MORRISON excels as a berry for both home and commercial planting. The large attractive berries meet all culinary requirements. They are high in quality, firm texture, juicy, not so seedy as other blackcaps. MORRISON berries hold up longer in grocery and market displays. They will outyield other Black Raspberry varieties.

"Not just another blackcap."

"Largest Black Raspberry I have ever seen."

"No diseased Morrisons have been found to this date."

"The most promising late Black Raspberry growing at the New York Station."—Geo. L. Slate.

Our Cumberland Blackcap listed on page 5 is reliable and good. Has been the outstanding commercial variety for many years. Now, however, Morrison comes along, and is just so much better in every way, that we are sure in a few years, everyone will be growing Morrison. It bears twice as many berries, because the plants grow twice as large, and the berries are a third larger, too. It is possible to pick 8 pints of berries from a single well-cared for plant, the second year after set, so you see you do not need to buy many for home use. At 30 cents per pint you can see it will pay you to buy a few plants and raise your own, and save your ration points for other things. We have less plants to offer this year than last on account of labor shortage. We were unable to fill one-third of the orders last spring, so you know what to do. Don't overlook the 20% discounts for early orders.

White BLACKBERRY

Strange as it may seem, this is a real creamy white Blackberry. Mixed with the jet black ones for dessert, it makes a most wonderful dish. The fruit is about the size of Alfred, with few seeds and quite sweet when fully ripe. The bushes are good, strong growers and very pro-

ductive. This is not a worthless novelty but a fruit of real value, and should be in every garden.

1-yr. No. 1 plants: 20c each; 6 for 90c; 12 for \$1.50. 2-year-old bearing-age transplants: 35c each; 3 for \$1.00; 6 for \$1.85; 12 for \$3.00. No discount.

RED LAKE CURRANT

This new, better and extra hardy large red Currant comes from Minnesota. This Red Lake is the last word in Currants and you will really want a few plants of them even if you think you have plenty of Currants already. Produce long, large, red clusters that make up into excellent jelly. Ships well and is the best commercial variety to grow.

Red Lake Prices: 2-yr., No. 1, 35c each; 3 for \$1.00; 6 for \$1.75; 10 for \$2.75. NO DISCOUNT.

HORSERADISH ROOTS

This is the good old Bohemian Horseradish. Will grow any place from high light sand to rich bottom land. Grates up fine and tender. White as snow, and strong as Samson.

Price: 6 roots for 35c; 12 for 55c. NO DISCOUNT.

RHUBARB

VICTORIA RHUBARB. Our giant red-stalked Rhubarb is the best that can be grown. It is early, tender, with a mild acid flavor. Delicious for sauce, pies, or jam. We are offering large 2-year roots with plenty of branch roots. Can be cut same year set. Six plants will supply a family.

Prices: 15c each; 6 for 50c; 12 for 90c; 25 for \$1.50. NO DISCOUNT.

CANADA RED RHUBARB. A brand new Rhubarb imported from Canada. Stems dark red clear to the heart and up in the leaf. Sauce made from our Canada Red will be as red as strawberry jam. Skin so tender it can be cooked with the stem. Grows to a giant size. Stock still limited. We offer divisions as it cannot be grown from seed. Each \$1.10; 2 for \$2.00. No discount.

NUTS

HARDY FILBERT. Can be grown anywhere. Perfectly hardy. Large well-filled nut. Bears young. 18-24 in., each 75c; 3 for \$2.00; 10 for \$5.95. 4-5 ft., each \$1.90; 3 for \$5.25. NO DISCOUNT.

NATIVE BLACK WALNUT.

A tree of large size and majestic form. The most valuable of all trees for its timber, bringing the very highest price in market. A good shade tree, and the large, oily nuts are of fine flavor and marketable at a fair price. 3-4 ft. trees, each 60c; 3 for \$1.50. NO DISCOUNT.

HOUGHTON GOOSEBERRY

Very large berries of delicious flavor. Greenish yellow in color turning to pink when fully ripe. Plants are perfectly hardy and vigorous growers. Bears young and annually on sturdy bushes. It's a money maker as well as a good pie variety. Three plants usually plenty for home use. Plants will last many years, with very little care. Just keep the weeds and grass from them.

Price: 50c each; 3 for \$1.35. NO DISCOUNT.

Mary Washington ASPARAGUS

There is no variety of Asparagus as good as Mary Washington, and whether for home use only or for market, you cannot afford to grow any other. This wonderful new Asparagus was developed and introduced by the U. S. Department of Agriculture, and although a recent introduction, it has become famous the country over.

Growers everywhere are discarding all other varieties in favor of Mary Washington, because it is earliest, the stalks are larger, more tender, more productive than any other variety.

Giant Cultivated

2 Plants
for only **\$350**
LESS DISCOUNT

BLUEBERRIES

You can grow our Giant Cultivated Blueberries right in your garden. Mix a little peat moss, sawdust or leaf mold with the soil to keep it acid. May also use in a shrub border, as their dark green waxy leaves turn bright red in autumn. Berries grow in clusters like small bunches of Grapes. Many berries as large as a nickel. Sweet and mild, with hardly any seeds like wild Huckleberries. Fruit ripens over several weeks' time, during the month of July. We advise planting TWO or more plants. Set 5 feet apart each way, and cultivate shallow, as their roots grow near the top. Our 3-year size plants usually start bearing the next year after set, although this size plant has a few buds. We offer Jersey, Rancocas, and Rubel varieties. Let us select the variety best suited for your locality.

DWARF APPLES

Dwarf and Semi-Dwarf Apple trees are just the thing for small back yards, and small places. Trees bear first and second year after set, and although they never grow larger than 5 to 8 feet tall, they bear standard size fruit. We offer 2-year-old trees. See front cover for picture in color.

DWARF

2-YEAR-OLD TREES

- YELLOW TRANSPARENT.** Hardy early bearer. Fruit yellow. Excellent cooking qualities, and fine flavor. Ripens in July.
- RED ASTRACHAN.** Bears regularly. Fruit red striped. Another good eating and cooking Apple. Juicy, fine flavor. Ripens in Aug.
- McINTOSH.** Bears annually and well. One of the best eating Apples of them all. Nearly all red, with snow-white flesh. Fine grained and tender. Ripens in September.
- CORTLAND.** Beautiful red Apple, a little larger than McIntosh. Excellent quality eating and cooking Apple. Keeps all winter and ripens in October.

The 4 varieties above may be had in the full DWARF. Plant so the bud union is 2 inches above the ground. The supply is very limited, so order early.

Price: Each \$3.50. NO DISCOUNT.
1 of each for \$12.00.

SEMI-DWARF 2-YEAR TREES

- NORTHERN SPY.** This favorite old Apple is hard to beat. Large, juicy, cream-colored flesh. Red stripes on a golden background. Excellent eating and cooking Apple. Keeps all winter. Ripens in October.
- ANOKA.** This is a fairly new Apple but a good one. Sometimes called the "Old Folks Apple," because it bears so young, even on standard roots. Beautiful red-striped fruit. Good quality eating and cooking Apple. Bears heavily and every year. Ripens in August.
- YELLOW TRANSPARENT.** See description to the left.
- McINTOSH.** See description to the left.
- CORTLAND.** See description to the left.

These five varieties may be had in the SEMI-DWARF. Supply of these are also limited, and it would be wise to order early and also give a second choice. If out of full dwarf we will reserve the right to fill your order with semi-dwarf.

PRICE: Each \$3.50; 3 for \$9.75.
1 of each for only \$15.00. NO DISCOUNT.

APPLES

DOUBLE RED DELICIOUS

This variety is far superior to the common red Delicious as it is highly colored all around, with no green sides. Double Red Delicious is America's number one Apple. It tops the market every time, and seems to bear in a wide range of soils and climates. The fruits are very large, solid red, with the five points, and rather long in shape. Truly a most beautiful Apple, and the best eating Apple of them all. Flesh slightly yellow, with semi-sweet flavor. 2- and 3-year-old sizes available.

JONATHAN

Everyone knows that Jonathan is second best seller on any market, Red Delicious being No. 1. Jonathan is a first class eating Apple. Not such a good cooker. Fruit dark red, flesh white, and a good keeper. Trees bear young, and yearly. There are more Jonathan and Red Delicious set than all the rest of the varieties combined. 2- and 3-year-old sizes available.

YELLOW TRANSPARENT

The finest extra early yellow Apple. It ripens in July and the season continues to September. The fruit is of medium size, and can be used for pies and sauce before it is entirely ripe. The flesh is white, mild, juicy, and sweet. Trees grow upright, and can be planted at much less distance than most other varieties. Bears young and regularly. 2- and 3-year sizes available.

YELLOW DELICIOUS

Winter. Tree comes into bearing early, producing heavy crops. Very thrifty, hardy, and a vigorous grower. A golden Apple which has won its fame as an outstanding commercial variety.

NORTHERN SPY

This fine well-known winter variety is juicy, of excellent flavor, fine for cooking and baking, as well as about the best eating Apple of them all.

CORTLAND

The young bearing habit of this fine new Apple has astonished growers everywhere. It is one of the greatest eating Apples, and also a good shipper. It is an offspring of the famous McIntosh. Clings to the trees till picked. Bears 2 to 3 years after planting. Fruit most highly colored red, fine grained, crisp and juicy. 2- and 3-yr. sizes available.

McINTOSH

McIntosh is a late fall Apple. The fruit is red, good size, with white flesh. We would say that it takes the place of the old-fashioned Snow Apple. It's an eating Apple. Trees grow fast and bear young. Not a winter keeper. 2- and 3-year sizes available.

ANOKA Semi-Dwarf

The Old Folks Apple

No waiting for fruit if you plant Anoka. Hardy in all climates. The best early summer Apple of red color. Wonderful cooking Apple, as well as a tasty eating Apple. Mellow and juicy. Not tart. The trees of the Anoka variety are somewhat dwarfed on account of their early bearing qualities. We offer you strong, healthy trees in both 2-year-old and in the SUPER size. Order yours early, as each year we sell out of ANOKA long before the season is over.

DOLGO CRAB

The perfect Crab. Hardy everywhere. Heavy bearer, usually beginning the year after setting. Jells perfectly even when dead ripe. A fine ornamental tree for the lawn as well as a wonderful commercial sort. Rapidly displacing such varieties as Transcendent and Hyslop. Bears young. Prices above.

Jonathan

PEACHES

The New REDHAVEN

NEW REDHAVEN PEACH

Long before other early Peaches are coloring, **Redhaven** is flaunting its bright red-all-over dress! It colors beautifully, long before ripe, and can be picked and marketed at a high price, while still firm enough to ship well.

Redhaven ranks with the best Peaches in richness of flavor, fineness and firmness of flesh, quality, yield, hardiness, and dependability. It bears a full crop after cold winters when other varieties fail.

It's a **freestone, self-pollenizing, extra early** Peach that will get the first high Peach prices, and bring extra profit for you.

Right at the beginning of the Peach season, when other early Peaches are still green, **Redhaven** Peaches are beaming from the tree like so many scarlet beacons! You can see them a great way off, and want to eat them even before they are soft! They get those first, eager, **big Peach dollars**, for they set their own price.

FAMOUS "HAVEN" FLAVOR

If you have grown and eaten South Haven and Hale-Haven, you have another treat in store when you taste **Redhaven**. It was originated by Stanley Johnston of South Haven Experiment

Station, who also originated the other "Havens." But this one tops them all, because it is so extra early, yet such a hardy variety, big bearer, and dependable cropper. A real, all-around Peach.

BRIGHTEST RED DRESS

Redhaven has the brightest coloring of any Peach. Looks like it's ripe 10 days or more before it's ready to pick.

Peach growers have always dreamed of having a Peach that really had color, flavor, quality, quantity, and would ripen early enough to avoid price competition. **Redhaven** more than answers that dream. It is destined to stand with all the big-profit Peaches. A freestone, perfectly self-pollenizing variety. Get started with **Redhaven** this spring!

REDHAVEN PRICES

HALE-HAVEN

Introduced by the Michigan Experiment Station. It is a cross between the J. H. Hale and the South Haven. Freestone. Yellow flesh. Firm. Excellent quality. Ripens last week in August. This is what we consider the very best Peach of them all. Trees are strong growers, and hardy. This variety will make you big money and should be planted extensively. No better variety ever introduced for canning and eating fresh.

2-year-old trees: Each \$1.25; 3 for \$3.00.

Super Size trees: Each \$1.50. LESS DISCOUNTS.

ELBERTA

This is the standard market Peach wherever you go. Fruit very large, oblong shape. Yellow, **freestone**, and tender flesh with a firm skin, which makes it the best shipping Peach. Ripens first week in September. Flesh turns to deep red near the pit. Good canning variety.

2-year-old trees: Each \$1.25; 3 for \$3.00.

Super Size trees: Each \$1.50. LESS DISCOUNTS.

ORANGE QUINCE

We list only this one Quince as we consider it by far the best. The trees commence to bear very young and produce big crops. Fruit is excellently flavored and of large size. **3-yr., Super Size: Each \$3.00. NO DISCOUNT.**

RUSSIAN MULBERRY

If you plant Cherry trees this year or now have Cherry trees growing, plant a **Russian Mulberry** for the birds. They will leave your Cherries alone, and eat the Mulberries. One tree is enough.

Price: \$1.00 each. Large, 5-6 ft. tree. **NO DISCOUNT.**

58 DAY Hybrid Sweet Corn

This is the earliest and sweetest of all Sweet Corn. Ears 7 to 9 inches long. Stalk grown to medium height and several ears on one stalk, when planted in good garden soil. Big moneymaker. Be the first one to offer Sweet Corn for sale this year. First Corn always brings 50c per doz.

Price: 1/2 lb., 50c; 1 lb., 85c; 5 lbs. for \$3.50. **NO DISCOUNT. POSTPAID.**

Hale-Haven

Hansen Bush Cherry

The New Quick-Bearing Cherry
EASY TO GROW—SURE TO PRODUCE
Highly Productive—Good Flavor
Hardy Everywhere

Though the fruit of this new Cherry much resembles a Plum in size and shape, it comes massed in clusters and at times almost completely covers the limbs. The tree grows in a dwarf bushlike shape, rarely getting over 4 or 5 feet tall. Also of striking ornamental value.

Plant Hansen Bush Cherries Because:

- 1—They are so easy to grow and are perfectly hardy everywhere.
- 2—Are good to eat fresh, and make delicious preserves.
- 3—Bear from the ground up, early, heavily, and annually.
- 4—Are dwarf growing, bushy, take up little room.
- 5—Excellent for hedges, ornamental shrubs and erosion control.

Prices: 1-yr.-old bushes (bear next year), each 25c; 5 for \$1.00; 12 for \$2.00; 25 for \$3.75; 100 for \$14.00.

LARGE, HUSKY, 3-yr.-old bushes, 2-3 ft. tall, ready to bear, each 75c; 3 for \$2.00; 10 for \$6.00.

PEARS

BARTLETT The most popular home use and commercial variety. Large yellow with red cheek. Flesh tender and juicy. Bears every year. Best for canning. Price: 2-year-old, 9/16 inch, each \$1.75; 3 for \$4.50. SUPER SIZE trees, each \$2.25. LESS DISCOUNTS.

SEEDLESS PEAR Brand new variety. Practically seedless. Solid all the way through. Ideal for canning. No waste. It is of the Bartlett type, pure white flesh with yellow blushed skin. Ripens 10 days later than Bartlett, and trees bear when 3 years old. A 5-year tree known to bear 3 bushels of fruit. Price: 2-year-old, 9/16 inch, each \$2.00. NO DISCOUNT.

CAMPA (New Campa.) An extra-large, mellow-yellow winter Pear. Belongs to the Kieffer family. More richly flavored, and of finer texture. Flesh is smooth, white, juicy, aromatic. Campa trees are thrifty growers, regular and heavy bearers. 2-year-old trees, each \$1.75; 3 for \$4.50. SUPER SIZE trees, each \$2.25. LESS DISCOUNTS.

KIEFFER This is the winter keeper Pear. Bears young. Large size. Fruits have an attractive appearance. Fine keeping and shipping qualities. Price: 2-year-old, each \$1.75; 3 for \$4.50. SUPER SIZE trees, each \$2.25. LESS DISCOUNTS.

VEST POCKET APPLE TREES 5 Varieties All on One Tree!

This is not just a novelty but a wonderful idea where folks have just a limited space to plant trees. This Vest Pocket Apple tree will give you five varieties all on one tree. From early to late winter Apples. This combination is Double Red Delicious, Yellow Delicious, Dark Red Jonathan, Wealthy and Crimson Winesap, all budded on Yellow Transparent stock. This will give you five varieties.

Prices: 2-year-old trees, each \$3.25. SUPER SIZE, 3-yr., each \$4.50. 5-year, each \$7.50. NO DISCOUNT.

Hardy Apricot

Produces good size fruit of an orange-yellow color with a darker red cheek. Very delicious flavor, with small freestone pit. They are very productive and bear young. As hardy as a Peach, and as easy to grow. Ripens in August.

2-year-old trees, each \$2.25. SUPER SIZE TREES, 2-year, each \$4.50. NO DISCOUNT.

Cherries

BING

This is that extra large blackish red sweet Cherry that you see in the fancy fruit stores, that sells anywhere from 35c to 60c per pound. Brittle and sweet. Small pit. Dark wine-red all the way through the meat. Remarkable keeping qualities, and a wonderful producer. Ripens about the time most of the smaller varieties are off the market. Brings the highest price on any market on account of its size and attractive appearance. Sells like hot cakes at all roadside stands. Trees are vigorous, and will grow anywhere on any kind of soil as long as it's well drained. Do not plant them where it is a little wet. Unless you already have a Cherry tree growing, we would advise you to plant at least two trees. These need not be of the same variety. Trees are hardy anywhere the temperature stays above 40 below zero.

Prices: **SUPER SIZE only**, each \$2.75; 3 for \$7.50; 6 for \$14.00; 10 for \$20.00. **LESS DISCOUNTS.**

MONTMORENCY

This is the largest of all pie Cherries. Fruit is large, bright red, and juicy. Ripens about 10 days after Early Richmond. This is the variety that is most widely planted in all Cherry-growing sections. Bears second or third year. Very hardy.

Prices: 2-year-old trees, each \$1.75; 3 for \$4.50; 6 for \$8.50; 10 for \$13.50, **LESS DISCOUNTS.** **SUPER SIZE**, each \$2.50; 3 for \$7.00, **LESS DISCOUNTS.**

RUSSELL HYBRID LUPINS

In our selected Russell Hybrid Lupines you will find a wide range of colors: Pinks, red, blue, maroon, purple, and many bicolors like blue and yellow, red and white, purple and cream, red and bronze, and many others. Many individual flowers an inch across. The flower spike resembles a closely set, rounded column of Sweet Peas. We offer you fine hardy 2-year-old plants that will give you a mass of bloom this year and many years after. All the flowers open at one time from top to bottom. Spikes 3 to 5 feet tall when planted in good garden soil. We offer mixed plants.

Price: 3 for \$1.10; 6 for \$2.00; 12 for \$3.60. **LESS DISCOUNTS.**

BLEEDING HEART

Beloved by all. One of the most delightful of the spring-flowering plants. Bears numerous rosy red, heart-shaped flowers pendent on long arching stems. **Clump plants, each 75c.**

[13]

MIXED GLADIOLUS

This wonderful mixture is made up of ten of the best and most popular varieties. All strong growers of every color. All giant flowers and many ruffled ones. Every bulb will bloom this year.

25 for \$1.25; 75 for \$3.00; 100 for \$3.50. **NO DISCOUNT.**

GOLDEN QUEEN

A beautiful large golden yellow Raspberry. Many prefer this variety to any of the reds or blacks, owing to its sugary sweetness, and unsurpassed flavor. Should be in every garden, its beauty and high quality placing it at the head for table use. The canes are hardy, vigorous growers, and heavy croppers.

CACO

This is the new quick growing, young bearing, delicious, sweet, big red Grape that is so popular. It has no equal as a home-use table grape. It has a peculiar characteristic found in no other Grape, in that it is rich in flavor. Its deep wine-red color is so pleasing to the eye. A vine full of these rich red beauties is a sight. Ripening in September like they do, the crop will be harvested long before killing frosts.

CONCORD

Concord is beyond a doubt the most popular blue Grape. More Concord are planted than all other varieties. It is the commercial table and wine variety. Concord is perfectly hardy, having stood 30 degrees below zero without injury. Does well on any soil, but makes the sweetest fruit on light sand that has been well fertilized. Bunches are large, compact and well shaped. Sweet and juicy. Vines grow fast, and bear second year.

SEEDLESS CONCORD

After years of experimentation and cross-breeding, a perfectly hardy seedless Grape has been developed. The first of a new race of Grapes that should eventually replace the common large-seeded varieties for table use. It is of the Concord type, but slightly smaller, blue-black in color, and possesses the same fine flavor found in the Concord Grape.

2-year, each \$2.00. NO DISCOUNT.

GOLDEN MUSCAT

This new hardy California yellow Grape can now be grown anywhere, because it's hardy enough. The berries are large, and form a big compact bunch that is very attractive. Quality is of the best, fruit being meaty with the Muscat aroma. Be sure to have at least one plant of this new variety in your garden or back yard, and be convinced.

2-year-old plants, each \$1.50. LIMIT. NO DISCOUNT.

FREDONIA

This new early black Grape was originated at the New York Experiment Station. No other Grape contains quite so much sugar as Fredonia. Bunches are large and compact. Very hardy, vigorous grower. Bears second year. Ripens 15 days ahead of Concord, and tops the market on account of its high quality. A few cents spent now for some Fredonia plants will be a lifetime investment, for which you will never be sorry.

NIAGARA

This is the great white Grape that succeeds most everywhere, even as far South as Florida. Bunches are nice, large, well shaped. Of a greenish white, turning to a light yellow when dead ripe. When fully ripe they are as sweet as honey. Vines are hardy, and bear young.

DELAWARE

Early. Vine moderately healthy and vigorous. Bunch small but compact, berries small to medium in size, red in color and of excellent flavor.

Shrubs and Shade Trees

HYDRANGEA P.G.

Flowers are extra large, white at first turning to a pretty pinkish purple, and later on in the fall to a perfect bronze. Fine winter bouquet. Blooms July to October.

18-24 inch plants, 40c each; 3 for \$1.00. 2-3 ft. size, 75c each.

HYDRANGEA A.G. (Hills of Snow)

This is the snowball type Hydrangea. Large blooms in June and lasts all summer. Will grow in the shade as well as sunlight.

18-24 inch plants, 40c each; 3 for \$1.00. 2-3 ft., 65c each.

PERSIAN LILAC, Purple

A decided improvement over the common Lilac. A shrub with slender, arching branches, attaining a height of 5 to 10 feet. The foliage is small, the flowers bright purple. Blooms in May and June. A much more profuse bloomer than the common, and does not sprout so from the roots. We consider the Persian much preferable.

2-3 ft., 50c each. 4-5 ft., \$1.00 each.

SPIREA, ANTHONY WATERER

The bright pink flowers are borne in full, flat clusters on erect stems in June and July.

15-18 inch plants: Each 40c.

SPIREA VAN HOUTTEI

One of the most common but still one of the most beautiful of all shrubs. So easy to grow. The branches covered with small white blooms will droop gracefully to the ground, and it is sometimes called Bridal Wreath. Blooms early spring.

Prices: 12-18 inch, well-branched plants, each 25c; 5 for \$1.00; 10 for \$1.75. 18-24 in., husky, each 35c; 3 for \$1.00.

NIOBE WEeping WILLOW

This is the yellow bark weeping willow, with the long, drooping branches, that dress up a yard so beautifully. Also fine for the rock gardens, along the bank of a stream or lake. Very hardy. Will grow on high ground or in water.

6-8 ft. trees: Each \$1.35. NO DISCOUNT.

BUDDLEIA, ROYAL RED Plant Patent Applied For

In presenting Buddleia Royal Red we believe we are introducing a new hardy plant that will be the sensation of the plant world for years to come. Royal Red represents 8 years of intensive breeding work, culminating in the first truly red Butterfly Bush. As a hardy summer cut flower plant and as an ornamental lawn shrub, Royal Red is unsurpassed in beauty and usefulness. From July until frost the plant produces an abundance of rich dazzling red panicles that attract instant attention. For garden planting, Royal Red is one of the most beautiful hardy plants that has ever been produced. The plant is hardy, grows 4 to 6 feet high and the foliage is deep leathery green. The sturdy plants we offer will flower abundantly the first year.

Husky, field-grown plants, ready to bloom, 85c each; 2 for \$1.50. NO DISCOUNT.

PRUNUS TRILOBA

(Rose Tree of China)

Dainty pink double flowers on graceful nodding branches in early spring. Fancy leaves color bronzy red in autumn. Grows 6 to 8 feet.

BRANCHED BUDDED TREES: 3-4 ft., trees: Each \$1.10; 3 for \$3.00.

MOCK ORANGE, Virginal

This is the new double white Mock Orange that is so fragrant that it will spray a room with perfume when used as a cut flower. No better shrubs to dress up the yard. Hardy.

18-24 in., 45c; 3 for \$1.25. 2-3 ft. size, each 60c; 3 for \$1.50.

PRUNUS NEWPORT

This ornamental flowering Plum is one of the finest. Upright spreading bush form. Dark red foliage all summer. In spring it will be covered with dainty pink double flowers. No fruit. A few of these in your yard will really add a splash of color to your landscape planting.

3-4 ft. trees: Each \$1.10; 3 for \$3.00.

CLIMBING ROSES

PAUL'S SCARLET CLIMBER. The "Reddest Rose That Grows" and the most popular of all climbers. Large, semi-double blooms in bold clusters hold their vivid scarlet color until the petals fall. Very fine for trellises and arches, or can be kept nipped back to bush form. 2-year-old plants: Each 50c.

BLAZE. Held by many to be the finest climber of all time. All the hardiness, strong growing habit and quality of its parent, Paul's Scarlet, plus the trait of being an everbloomer. We heartily recommend this fine climber to anyone who is seeking the most in satisfaction from climbing Roses. 2-yr., No. 1, each \$1.50. NO DISCOUNT.

All items on this page LESS DISCOUNTS, except where marked NO DISCOUNT.

Silver Juniper

Irish Juniper

Mugho Pine

Evergreens

SPINY GREEK JUNIPER
(*Juniperus excelsa stricta*)

**All Evergreen Prices
NO DISCOUNT**

Narrow, columnar, having many erect branches and branchlets. Foliage spiny, with sharp points, glaucous blue. Of extremely dense growth and develops a formal shape, valuable in landscape. Grows slowly, eventually reach a height of 5 feet, with a spread of 2½ to 3 feet. Can be kept smaller by trimming. Plant in a dry, sunny location.

1 ft. tall, each \$1.25.

SILVER JUNIPER

Erect, broadly pyramidal habit; flat, beautifully carved, bright foliage, dense from ground up; grows rapidly and soon forms a beautiful tree. Usually seen as a tree 5 to 10 feet high and half as wide but grows to be a large tree. Used extensively as single specimens, for foundation planting, screens and wind-breaks, and heads the list for evergreen hedge planting.

18-24 inch specimens, each \$2.00. 2-3 ft., each \$3.00.

IRISH JUNIPER

Of decided columnar form and immediately attracts attention. For formal work, especially in contrast with other plants, it has decided advantage over anything you can use for such work. Slender in habit; needs no shearing.

12-18 inch, each 75c. 2-3 ft., each \$2.00.

MUGHO PINE

Our Dwarf Mugho Pine are the dwarf, pincushion type. Compact and hardy. We offer plants 6 inches tall and a 6-inch diameter top, 5 years old. These dwarf plants are slow growing but so far superior to Montana Mugho.

Price: Each, 6x6 in., 75c; 10x10 in., \$1.00; 16x16 in., \$2.75; 20x20 in., \$3.25; 24x24 in., \$4.00.

PYRAMIDAL ARBOR-VITAE

Dark green foliage. Hardy, pyramidal shape. Grows anywhere. Plant one on each side of your garden gate or the entrance to your home.

18-24 inch, \$1.00 each. 2-3 ft., each \$2.00.

SAVIN JUNIPER

The favorite trailer—beautiful, dependable, and hardy everywhere. Dark green, tufted foliage covers dense, spreading branches, producing an ideal plant for the foreground, and giving the finest sort of finish to foundation groups, park or formal beds. It endures smoky conditions of the city, and is at home everywhere. You will be well pleased with our fine specimens. Seldom over 3 feet high at maturity.

18-24 inch, each \$2.00.

PFITZER'S JUNIPER

This is one of the most popular Junipers. Spreading type, very hardy. Grows anywhere, even in shade. Wet or dry. Silvery green foliage.

12-15 inch, each 85c. 18-24 inch, each \$2.50.

SPREADING YEW

Beautiful Yew of moderate bushy growth, usually grows wider than tall. Branches from the bottom, developing into a bush form. Spreading branches densely clothed with short, dull green leaves. The most attractive spreading Evergreen. Will grow in semi-shade.

12-15 inch, each 85c.

COLORADO BLUE SPRUCE

A very hardy Evergreen. One of the most beautiful for landscape work. Foliage is greenish blue to silvery blue. Should be set in open sunlight, not too near other trees and buildings for best color.

12-15 inch, each 45c; 5 for \$2.00; 10 for \$3.50; 25 for \$7.00. NO DISCOUNT.
